Jan 13, 2019 here is video tutorial how to use any other other free apps like third party games from this blog, your browser.. The best Marathi Keyboard for Windows 10, Windows 7/8/8.1/9. Free download. MS Windows. Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1. Windows 10. All Languages.. This is fully tested with latest Windows operating systems. All Windows versions. All.To know when people like your submissions, answer your questions, reply to you, etc., please create a free account and log in. Premium membership is also available for just \$12 a year, which removes all adverts, prioritises your submissions, and more. Continuity mistake: When Monroe is putting on the brown eye liner she says, "I know I look ridiculous." Then, after putting on the brown eye liner, she says, "I'm glad I'm not wearing glasses." - In the bathroom scene when she tries to draw her hair back with the hair gel, it looks like she is wearing glasses. Continuity mistake: When the President is viewing the video of the invasion on the monitor, it looks like him and O'Donnell are having a conversation, although they are both shown alone in the room. However, when the President then views the video, the monitor shows him speaking to someone off-screen, and then the President is shown back at the monitor. Continuity mistake: When Monroe is finally getting undressed, her back turns black (on the left). When she gets fully undressed, it's back to her usual back in the right image. - The entire scene with Monroe coming down the stairs. Visible crew/equipment: When the President takes a close up of the video screen, a small light is visible on the side of the monitor. This is presumably a lighting effect or some sort of camera effect.Q: How to read the data in a file in spark? I have a file that has one column. I want to read that file in spark so that the value of the column is in different row (one value per row). Can anyone please help me how to do this? A: scala> val lines = sc.textFile("/tmp/lines.txt") lines: org.apache.spark.rdd.RDD[String] = /tmp/lines.txt Map 2d92ce491b
